UIDynamicItem Protocol Reference

Adopted by	UIView UICollectionViewLayoutAttributes
Conforms to	NSObject
Framework	/System/Library/Frameworks/UIKit.framework
Availability	Available in iOS 7.0 and later.
Declared in	UIDynamicBehavior.h

Overview

Important: This is a preliminary document for an API or technology in development. Although this document has been reviewed for technical accuracy, it is not final. This Apple confidential information is for use only by registered members of the applicable Apple Developer program. Apple is supplying this confidential information to help you plan for the adoption of the technologies and programming interfaces described herein. This information is subject to change, and software implemented according to this document should be tested with final operating system software and final documentation. Newer versions of this document may be provided with future seeds of the API or technology.

To make a custom object eligible to participate in UIKit Dynamics, adopt the `UIDynamicItem` protocol in the object's class.

Starting in iOS 7, the `UIView` and `UICollectionViewLayoutAttributes` classes implement this protocol.

Tasks

Participating in Dynamic Animation

bounds (page 4) *required property*

Called when a dynamic animator needs the bounds of the dynamic item. (required) (read-only)

center (page 4) *required property*

The center point of the dynamic item. (required)

transform (page 5) *required property*

The rotation of the dynamic item. (required)

Properties

bounds

Called when a dynamic animator needs the bounds of the dynamic item. (required) (read-only)

```
@property(n nonatomic, readonly) CGRect bounds
```

Availability

Available in iOS 7.0 and later.

Declared in

UIDynamicBehavior.h

center

The center point of the dynamic item. (required)

```
@property(n nonatomic, readwrite) CGPoint center
```

Discussion

The dynamic animator (that the item is associated with) calls this method when it has computed a new center point for the item.

Availability

Available in iOS 7.0 and later.

Declared in
UIDynamicBehavior.h

transform

The rotation of the dynamic item. (required)

```
@property(n nonatomic, readwrite) CGAffineTransform transform
```

Discussion

UIKit Dynamics makes use only of the rotation value in this property.

The dynamic animator (that the item is associated with) calls this method when it has computed a new rotation value for the item.

Availability

Available in iOS 7.0 and later.

Declared in
UIDynamicBehavior.h

Document Revision History

This table describes the changes to *UIDynamicItem Protocol Reference*.

Date	Notes
2013-06-10	New document that describes the interface that allows an object to participate in UIKit Dynamics.
